50X1-HUM

The "478" was the latest model built and completed in 1951. The "468" was dropped in 1950. The only progress made on the "468" was the paper design, and no model was actually built. The "478" was a modification of the "468", was bigger and was designed as an interceptor. The layout and design were performed by GUENTHER. Actually, the "468" was an experimental model and was never built.
